	Dryer
	Warm Seat
	Adjustable air/water/seat temperature settings
	Adjustable water pressure settings
	Soft Close Lid & Seat
	Human Sensor
	Made from Anti-microbial (germ resistant) materials

His & Hers Nozzle

The Wash function features a solid stream of water to thoroughly clean the posterior. The Bidet nozzle provides a softer, gentler cleaning that is more suited for feminine hygiene.

Adjustable water pressure and temperature

Personalise your comfort. Settings can be adjusted for seat temperature, water temperature, dryer temperature as well as water pressure.

Warm seat

Your Royalet will always have a warm welcome for you. With adjustable seat warmth, there'll be no more cold surprises on winter mornings.

Sensor activated seat & hydraulic closing.

The Royalet has a special sensor so that the bidet only activates once someone sits on the seat. The hydraulic lid and seat closes quietly, and gently, with a simple touch.

Self cleaning nozzles

Nozzles perform a self cleaning rinse before and after each use.

Anti Microbial Seat

The seat and nozzle are formulated from Anti-Microbial materials for germ resistance.

Warm air drying

Warm air gently dries any moisture. 4 step temperature control for optimum comfort.
