

RA-CWB Royalet Fresh Water Bidet seat.

Features	
Operational Functions	Uses Fresh tap water
	Front & Back wash nozzles
	Soft Close Lid & Seat
	Made from Anti-microbial (germ resistant) materials

Front & Back Wash Nozzles

The Back Wash function features a solid stream of water to thoroughly clean the posterior. The Front Wash nozzle provides a softer, gentler cleaning that is more suited for feminine hygiene.

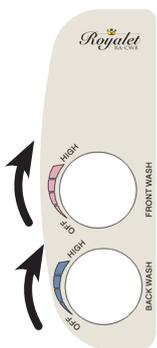

Hydraulic soft closing lid/seat.

The hydraulic lid and seat closes quietly, and gently, with a simple touch.

Anti Microbial Seat

The seat is formulated from Anti-Microbial materials for germ resistance.

Easy to install

Connects to your fresh water cistern supply using a T-Valve connection and hose (all necessary fittings supplied).

Easy to operate

Simply turn the dial clockwise to start washing. Adjust the dial to your personal comfort by increasing or decreasing water pressure.
